DETAILED ACTION

Allowable Subject Matter

Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art known to the Examiner is listed on the PTO 892 and IDS forms of the previous Office actions. None of the references or combinations thereof disclose or suggest a base layer formed in a base region on the *covering a side surface of the outgoing base electrode*, connected first semiconductor layer, to the outgoing base electrode at the side surface of the outgoing base electrode, *and formed of silicon germanium containing carbon*; and a second semiconductor layer formed on the base layer, wherein only the base layer is connected to the first semiconductor layer in the base region as required by the presently claimed invention. Moreover, the cited prior art does not disclose or suggest a base layer formed in a base region on the first semiconductor layer, connected to the outgoing base electrode, and formed of *silicon germanium containing carbon*; and a second semiconductor layer formed on the base layer, the *outgoing base electrode and the base layer are formed continuous to each other*, wherein only the base layer is connected to the first semiconductor layer in the base region as required by some of the present claims. Therefore, the present Claims are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
